SERVICE AREAS

From fuel supply to fabrication

7

MARKETS SERVED

Private and public sectors

Kuruman lies close to some of South Africa's largest iron ore and manganese operations.

A Northern Cape company with a national outlook.

Mrala Enterprise (Pty) Ltd was founded in Kuruman in 2016. We are a black-owned company with Level 1 B-BBEE status, registered with the Companies and Intellectual Property Commission under number 2016/465150/07.

Our work covers fuel supply, construction and civil works, mining support, material handling plants, rail infrastructure, plant maintenance and shutdowns, industrial engineering and specialised manufacturing, steelwork and fabrication, stemming and dust suppression, labour hire and industrial supplies.

On most sites these services depend on one another. When fuel, maintenance and site support come from one contractor, there are fewer hand-offs to manage and a single point of accountability when something needs attention.

Every engagement starts with the requirements: the site, the schedule, the budget and the standard expected. We then propose a practical solution, agree the scope in writing and keep the client informed until the work is closed out.

The aim is straightforward. We want to be the contractor clients call first, because we were dependable the last time.

OUR APPROACH

Practical solutions. Reliable delivery.
Strong partnerships.

Why we exist and where we are going.

OUR MISSION

To deliver reliable, efficient services across fuel, construction, mining and industrial support, safely, compliantly and with integrity.

01 Deliver reliable and efficient solutions in every service line we offer.

02 Meet regulatory requirements and uphold safe working practices.

03 Respond quickly and deliver projects dependably.

04 Build long-term relationships with clients, suppliers and partners.

05 Operate with professionalism, accountability and integrity.

OUR VISION

To be a trusted multi-sector service provider across South Africa.

01 Contribute to economic growth through fuel, construction and industrial services.

02 Grow our reach and capabilities without compromising service quality.

03 Support sustainable operations and meaningful participation in our industries.

The standards we hold ourselves to.

Four values shape how we work with clients, suppliers and one another. They are easy to write down. We judge ourselves by whether they show up in the work.

01 Customer focus

We listen before we propose. Solutions are shaped around the client's operation, not around what is easiest for us.

02 Excellence

We aim for quality, efficiency and consistency in every delivery, whatever its size.

03 Integrity

We act honestly, transparently and professionally, and we raise problems early rather than late.

04 Accountability

We take responsibility for our commitments and for the outcomes they produce.

Six service areas. One point of accountability.

Clients can contract a single service or combine several under one agreement. Either way, one team coordinates the work and answers for it.

01

Fuel supply and energy

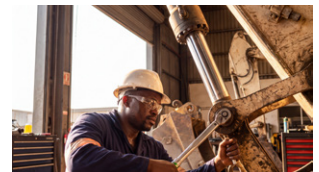

Bulk diesel, illuminating paraffin and lubricants, delivered to site on a planned schedule or at short notice by arrangement.

02

Mining services

Equipment and material handling plant maintenance, roof bolting, cable netting, protective coatings, stemming and dust suppression.

03

Rail infrastructure

Track installation, rehabilitation, maintenance and repairs, together with rail component fabrication.

04

Industrial engineering and manufacturing

Specialised engineering spares, conveyor components, line boring, fabrication, site maintenance and shutdown support.

05

Construction and civil works

Civil and municipal infrastructure, water and sewer reticulation, turnkey project support, paving, painting and general site works.

06

Supply and operational support

Industrial supplies, labour hire, cleaning materials and specialised support services.

Fuel where and when the work needs it.

We supply and distribute clean fuel to commercial, industrial, mining, construction, agricultural and public-sector operations.

Supply is planned around each client’s consumption, storage capacity and delivery windows. We source through licensed suppliers and work with compliant transport partners, so that product integrity is protected from depot to tank.

PETROLEUM PRODUCTS

Diesel (ADO)

Automotive diesel oil in 50 ppm and 500 ppm grades

Illuminating paraffin

Kerosene for heating, lighting and industrial use

Lubricants and oils

For machinery, vehicles and equipment

Other fuel and energy products

Where supply arrangements permit

Products, grades and volumes are subject to availability and client requirements.

A supply chain you don't have to manage.

Fuel is only useful if it arrives on time and to specification. We take on the planning, sourcing and logistics so that your teams can concentrate on production.

Deliveries can be scheduled for ongoing operations, with urgent supply available by arrangement.

HOW WE SUPPLY

01

Assess

We confirm products, volumes, storage and delivery windows.

02

Plan

We agree a supply schedule and terms, short or long term.

03

Source

Product is sourced through licensed suppliers.

04

Deliver

Compliant transport partners deliver in bulk or direct to site.

05

Support

Scheduled deliveries continue, with urgent top-ups by arrangement.

SUPPLY CAPABILITIES

- Bulk fuel supply and delivery for ongoing operations
- On-site delivery to mines, construction sites and industrial facilities
- Supply planning for commercial fleets, equipment and storage tanks
- Scheduled deliveries, with urgent supply by arrangement
- Flexible short- and long-term supply agreements
- Coordination with licensed suppliers and compliant transport partners

OUR COMMITMENT

Product integrity, safe handling, compliant transport and clear communication, from order to delivery.

Support for the mine, from the workshop to the rock face.

Mines run on equipment that cannot afford to stand idle. Our mining services cover the maintenance, ground support, surface protection and blasting support that keep equipment working and operations productive.

MAINTENANCE

- Mining equipment maintenance
- Plant maintenance
- Mechanical maintenance

GROUND SUPPORT

- Steel enclosure roof bolting
- Steel cable netting

SURFACE PROTECTION

- Shot blasting
- Specialised protective coatings
- Corrosion protection

BLASTING AND DUST CONTROL

- Drop raise solutions
- Stemming
- Dust suppression

WORKING UNDERGROUND AND ON SURFACE

Our teams work to each mine's site rules, permits and safety standards, and plan around production so that maintenance causes as little disruption as possible.

06 — MINING SERVICES

From crusher to conveyor.

Material handling plant keeps ore moving from the pit to the stockpile. When it stops, production stops with it.

We maintain, install and rehabilitate crushing, screening and conveying plant, control dust at conveyor transfer points and support plant shutdowns, working to each mine's site rules and production schedule.

MATERIAL HANDLING PLANTS

- 01 **Material handling plant maintenance and support**
- 02 **Crushing, screening and conveying systems**
- 03 **Plant installation, maintenance and rehabilitation**
- 04 **Dust suppression systems and conveyor transfer-point solutions**
- 05 **Plant shutdown and mechanical maintenance support**

07 — RAIL AND INDUSTRIAL SERVICES

Track that carries the load.

Rail infrastructure

Rail carries much of the Northern Cape's mineral output. We install, rehabilitate and maintain track, carry out repairs and fabricate rail components for industrial and mining operations.

- Rail installation
- Rail rehabilitation
- Rail maintenance
- Track repairs
- Rail component fabrication
- Industrial rail support

Industrial services

Maintenance and shutdown work is planned around production, with the engineering and steelwork skills to see each job through to handover.

- Industrial site maintenance
- Shutdown support
- Engineering maintenance
- Steelwork and fabrication
- Specialised industrial and operational support

Industrial engineering & specialised manufacturing.

We manufacture and supply specialised engineering spares for mining and industrial plant, and provide the design, fabrication, refurbishment and maintenance support that keeps equipment in service.

CAPABILITIES

01 **Manufacture and supply of specialised engineering spares**

02 **Conveyor rollers, idlers and scrapers**

03 **Hydraulic spares and pump components**

04 **Specialised pipework and flanges**

05 **Dust suppression atomiser kits for conveyor transfer points**

06 **On-site line boring services**

07 **Engineering design, fabrication and equipment refurbishment**

08 **Mechanical, electrical and plant maintenance support**

09 — CONSTRUCTION AND SUPPORT SERVICES

Built to specification, supported on site.

01

Construction and civil works

- Building and civil construction
- Infrastructure maintenance and rehabilitation
- Paving, painting and general site works
- Project support aligned with client scope and specifications

02

Engineering, plant and fabrication

- Plant maintenance and shutdown support
- Mechanical and engineering maintenance
- Steelwork, fabrication and repairs
- Industrial equipment and component support
- Mining and rail infrastructure support

03

Supply and operational support

- Industrial supplies and mining equipment support
- Labour hire and project personnel
- Cleaning materials and general operational supplies
- Stemming and dust suppression
- Specialised support services to project requirements

CONSTRUCTION, INFRASTRUCTURE & TURNKEY PROJECTS

- Civil and municipal infrastructure works
- Material handling plant installation and rehabilitation
- Mechanical and electrical installation support
- Water, greywater and sewer infrastructure and reticulation
- Plant infrastructure upgrades and maintenance
- Turnkey project support, from design coordination through to installation and maintenance

Scope and delivery arrangements are agreed with each client before work begins, so that the job reflects project requirements, site conditions, safety expectations and the agreed schedule.

From mines to municipalities.

We work for mining operations, contractors, farms, manufacturers and public bodies across seven markets. What they have in common is work that depends on reliable supply and dependable people.

Mining

Equipment support, maintenance, stemming, dust suppression and industrial services.

Construction

Fuel supply, civil works, infrastructure and project support.

Energy and fuel

Bulk fuel supply, on-site delivery and operational energy support.

Rail and infrastructure

Rail rehabilitation, maintenance, repairs and component fabrication.

Agriculture

Fuel and operational support for farming and related activities.

Industrial and manufacturing

Engineering spares, plant maintenance, shutdowns and supply services.

Government and municipalities

Municipal infrastructure, supply and service solutions that meet public-sector requirements.

Your operation

Tell us what your site needs. We will tell you plainly what we can deliver.

Responsible delivery, on every site.

Quality, safety, compliance and environmental care are part of how we plan and deliver. Requirements differ by product, service, site and contract, so we address each one on its own terms.

QUALITY AND SERVICE

- We clarify scope, specifications and delivery expectations with clients before work begins.
- We use suppliers and service partners suited to the work required.
- We monitor delivery arrangements and keep communication clear.
- We work towards consistent, dependable service and client satisfaction.

HEALTH, SAFETY AND ENVIRONMENT

- We promote safe work practices and responsible conduct on site.
- We support the safe handling, storage and transport of fuel and materials.
- We work with compliant, suitably qualified service providers where required.
- We encourage environmental awareness and act to prevent avoidable impacts.
- We align project execution with site rules, applicable legislation and contract requirements.

Six reasons to work with us.

Clients choose a contractor for what happens after the contract is signed. These are the things we are judged on, and the things we work hardest to get right.

01

Multi-sector capability

Fuel supply, construction, mining, engineering, rail and industrial support from one contractor.

02

Client-focused delivery

Solutions shaped around your scope, budget and operating needs.

03

Reliable coordination

Careful planning, clear communication and delivery that matches what was agreed.

04

Safety and compliance

Close attention to applicable requirements and responsible operations.

05

Accountability

A professional approach to commitments and working relationships.

06

Empowerment credentials

A black-owned enterprise with Level 1 B-BBEE status.

HOW WE WORK

01

Understand

We start with your site, schedule, budget and standards.

02

Plan

We agree scope, resources and timelines in writing.

03

Deliver

We carry out the work safely, with regular updates.

04

Close out

We confirm the work meets what was agreed, and stay on hand for what comes next.
